

Sudhan Textile Mills

User Manual for Sudhan Textile ERP

Document Title	Sudhan Textile ERP - Detailed Operations Manual
Version	1.0
Prepared For	Sudhan Textile Mills
Prepared By	Implementation Team
Date	05 April 2026

Confidential: This document provides detailed, step-by-step workflow instructions and operational guides for all functional modules of the system.

1. Executive Summary

Sudhan Textile ERP is a comprehensive and advanced management solution tailored strictly for the textile manufacturing industry, focusing profoundly on Sizing and Warping operations. The system helps manage the core foundation via Masters, controls transactions via Sizing ERP, and handles global logic through System Settings. This manual offers deep operational documentation on utilizing the full web-based software suite, covering all 27 distinct views.

2. Dashboard & System Analytics

2.1 Administrative Dashboard

Overview & Purpose: The Dashboard serves as the central hub of operations, delivering immediate analytical insights on plant performance and pending tasks.

Step-by-Step Instructions:

- View aggregated metrics such as Total Active Sizing Sets, Today's Sizing Production, Total Yarn Stock, and Invoices Pending Payment.
- Use the visual graphs and efficiency trackers to monitor the health of current mechanical operations.
- Utilize the quick-access actions integrated on the right-hand panel to immediately jump into creating a New Set or receiving new Yarn.

3. System Masters Module

Master configurations are the foundational data points used to populate dropdowns, define parameters, and standardize metrics across operational forms.

3.1 Company Master

Overview & Purpose: Central configuration defining your organizational identity and formal contact information.

Step-by-Step Instructions:

- Navigate to the 'Masters' section and select 'Company'.
- Fill in essential fields including the Official Company Name, Registration details (PAN/GSTIN), and precise communication addresses.
- Save the record. Note that details entered here directly reflect on generated Tax Invoices and Delivery Challans.

The screenshot displays the 'Company Master' configuration page within the 'SUDHAN TEXTILE SIZING ERP SYSTEM'. The interface includes a sidebar with navigation options like Dashboard, Masters, and various ERP modules. The main content area is titled 'Company Master' and contains several sections for data entry:

- Basic Information:** Fields for Company Name (*), Short Name (*), GSTIN, and PAN.
- Contact Information:** Fields for Phone, Email, and Website.
- Address:** Field for Address Line 1 (*).
- Bank Details:** Fields for Bank Name and Branch.

The form is pre-filled with the following data:

Section	Field	Value
Basic Information	Company Name *	Sudhan Textile Mills Pvt Ltd
	Short Name *	STMPL
	GSTIN	33AABCS1234A1Z5
	PAN	AABCS1234A
Contact Information	Phone	0424-2345678
	Email	info@sudhantextile.com
	Website	www.sudhantextile.com
Address	Address Line 1 *	123, Industrial Estate, SIPCOT
Bank Details	Bank Name	State Bank of India
	Branch	Erode Main Branch

3.2 Parties Master

Overview & Purpose: A singular repository managing all external entities the business interfaces with, including suppliers, clients, and partner mills.

Step-by-Step Instructions:

- Open the 'Parties Master' dashboard.
- Click on 'Add New Party' to register a new vendor or client.
- Specify their category (e.g., Weaving Mill) to appropriately restrict their assignment to job cards.
- Update contact properties and formal billing details like their specific tax boundaries.

The screenshot displays the 'Parties Master' dashboard within the 'SUDHAN TEXTILE SIZING ERP SYSTEM'. The interface includes a sidebar with navigation options such as Dashboard, Masters, Company Master, and Party / Vendor. The main content area shows a table of parties with columns for CODE, NAME, TYPE, CITY, GSTIN, CONTACT, CREDIT, STATUS, and ACTIONS. The table lists four parties: KWM (Kumar Weaving Mills), LWM (Lakshmi Weaving Mills), NTM (New Textile Mills), and SBF (Sri Balaji Fabrics). Each party has a status of 'Active' and an 'Add Party' button is visible in the top right corner.

CODE	NAME	TYPE	CITY	GSTIN	CONTACT	CREDIT	STATUS	ACTIONS
KWM	Kumar Weaving Mills	Customer	Salem, Tamil Nadu	33AABCK2345E127	0427-3456789	30 days / ₹600,000	Active	Edit Delete
LWM	Lakshmi Weaving Mills	Customer	Erode, Tamil Nadu	33AALFL4567B128	0424-2234567	30 days / ₹500,000	Active	Edit Delete
NTM	New Textile Mills	Customer	Coimbatore, Tamil Nadu	33AAMFN7890C122	0422-3345678	45 days / ₹750,000	Active	Edit Delete
SBF	Sri Balaji Fabrics	Supplier	Erode, Tamil Nadu	33AABF55678D124	0424-2456789	30 days / ₹1,000,000	Active	Edit Delete

3.3 Yarn Count Master

Overview & Purpose: A critical matrix establishing the varied specifications of raw yarn brought into the factory.

Step-by-Step Instructions:

- Navigate to 'Yarn Count Master'.
- Introduce standard designations (e.g., '20s 2/100', '30s 2/80').
- Attach intrinsic properties like ply thickness. These pre-configured counts will speed up the process during Yarn inward documentation.

3.4 Loom Type Master

Overview & Purpose: Mapping of available manufacturing hardware capabilities ensuring job cards align with physical capacities.

Step-by-Step Instructions:

- Access the 'Loom Type Master' menu.
- Register hardware models such as 'Sulzer' or 'Air Jet'.
- Define the maximum physical width in inches to enforce capacity rules during production allocations.

The screenshot displays the 'Loom Type Master' interface within the 'SUDHAN TEXTILE SIZING ERP SYSTEM'. The left sidebar shows a navigation menu with 'Masters' expanded, listing various master data entities. The main content area is titled 'Loom Type Master' and includes a summary card showing 'Total Loom Types: 8' (8 active). Below this is a search bar and a table listing the loom types. The table has columns for CODE, LOOM TYPE NAME, WIDTH (INCHES), STATUS, and ACTIONS. Three loom types are visible: AIR36 (Air Jet 36 inches, 36.000", Active), AIR44 (Air Jet 44 inches, 44.000", Active), and PRJ36 (Projectile 36 inches, 36.000", Active). The interface also shows a sidebar for 'Sizing ERP' with 'Active' status and a 'System Administrator' login.

CODE	LOOM TYPE NAME	WIDTH (INCHES)	STATUS	ACTIONS
AIR36	Air Jet 36 inches	36.000"	Active	...
AIR44	Air Jet 44 inches	44.000"	Active	...
PRJ36	Projectile 36 inches	36.000"	Active	...

3.5 Beam Master

Overview & Purpose: An active registry tracking the lifecycle and mechanical properties of physical beams.

Step-by-Step Instructions:

- Open 'Beam Master' to see a breakdown of 'Sizing Beams' and 'Warping Beams'.
- Register individual beams with unique Beam Numbers.
- Configure their tare weights (kg) and maximum ends. This data is critical for net yarn weight calculations.

3.6 Vehicle Master

Overview & Purpose: Logistical management of the active transport fleet bringing goods in and out.

Step-by-Step Instructions:

- Add logistics vectors by entering the Vehicle Registration Numbers.
- Maintain details regarding primary drivers and their contact coordinates.
- These vehicles are subsequently linked to Delivery Challans and Inbound Receipts.

3.7 Financial Year Master

Overview & Purpose: Time-boxing parameters configuring sequential numbering rules and financial closure calculations.

Step-by-Step Instructions:

- Head to 'Financial Year Master' configuration.
- Establish absolute Start Dates and End Dates for the fiscal cycle.
- Activating a financial year directly impacts the Document Series suffixes applied system-wide.

3.8 Document Series Master

Overview & Purpose: Regulation of automatic identification prefixing and invoice enumerations to maintain audit integrity.

Step-by-Step Instructions:

- Under Document Series, configure the string Prefixes for different forms (e.g., 'INV' for Invoices).
- Link them to the Active Financial Year to generate standardized formats like 'INV0001/2025-26'.

4. Sizing ERP Operations

This functional core tracks every phase of the physical textile operation—from raw yarn intake, machine processing, right down to delivery and invoicing.

4.1 Yarn Receipt (Inward Workflow)

Overview & Purpose: Formal tracking protocol for all bound raw materials entering the warehouse.

Step-by-Step Instructions:

- Navigate to Sizing ERP > Yarn Receipt.
- Click on '+ New Receipt' and fill in the DC number assigned by the transport provider.
- Select the delivering Party and assign the internal vehicle associated with the drop.
- Add line specific items: defining exact yarn count lots, cone frequencies, and weight measurements.
- Submit the form moving it to 'Pending Approval' for inventory update authorization.

The screenshot displays the SUDHAN TEXTILE SIZING ERP SYSTEM interface. The left sidebar contains a navigation menu with options: Dashboard, Masters (Company Master, Party / Vendor, Yarn Count, Loom Type, Beam Master, Vehicle Master, Financial Year, Document Series), Sizing ERP (Active), Yarn Receipt, Baby Cone / Winding, and Warping Job Card. The main content area is titled 'Yarn Receipt (Inward)' with the subtitle 'Manage yarn inward entries from vendors and mills'. It features a summary section with four cards: 'Today's Receipts' (0, 0.000 kg), 'This Week' (0, 0.000 kg), 'This Month' (2, 600.000 kg), and 'Pending in Stock' (2, 600.000 kg). Below this is a search bar and filters for 'All Dates' and 'All Status'. The 'Yarn Receipts (2)' section shows a table of complete list of yarn inward entries with stock status.

RECEIPT NO	DATE	PDC NO	PARTY / MILL	LOT NO	COUNT	BAGS	CONES	NET WEIGHT (KG)	STATUS	ACTIONS
YR0002/2025-26	10/03/2026	-	New Textile Mills	LOT-2025-B01	30s 2/80	1	72	300.000	Available	...
YR0001/2025-26	08/03/2026	-	Lakshmi Weaving Mills	LOT-2025-A01	20s 2/100	2	72	300.000	Available	...

4.2 Baby Cone / Winding Operations

Overview & Purpose: Managing intermediary conversion procedures dividing the major cones into manufacturing appropriate sizing sets.

Step-by-Step Instructions:

- Access the Winding forms.
- Record inbound bulk cones and lot classifications.
- Measure and enter the calculated quantity, output weights of the newly wound 'Baby Cones'.
- This inherently logs percentage waste parameters during process transition.

The screenshot displays the SUDHAN TEXTILE SIZING ERP SYSTEM interface. The left sidebar contains navigation options: Dashboard, Masters (Company Master, Party / Vendor, Yarn Count, Loom Type, Beam Master, Vehicle Master, Financial Year, Document Series), Sizing ERP (Active), Yarn Receipt, Baby Cone / Winding, and Warping Job Card. The main content area is titled 'Baby Cone / Winding' and includes a subtitle 'Manage winding operations and baby cone entries'. It features four summary cards: 'Total Baby Cones' (2), 'Available for Warping' (250), 'Total Weight' (250.000 kg), and 'Today's Entries' (0). Below these cards is a search bar and a dropdown menu for 'All Status'. A table lists baby cone entries with columns: BC NO, DATE, RECEIPT NO, PARTY, COUNT, LOT NO, CONES, NET WEIGHT, WINDING LOSS, STATUS, and ACTIONS. The table contains two entries: one for 'New Textile Mills' with a count of 30s 2/80 and another for 'Lakshmi Weaving Mills' with a count of 20s 2/100. The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 14:11 on 05-04-2026.

BC NO	DATE	RECEIPT NO	PARTY	COUNT	LOT NO	CONES	NET WEIGHT	WINDING LOSS	STATUS	ACTIONS
BC0002/2025-26	10/03/2026	YR0002/2025-26	New Textile Mills	30s 2/80	LOT-2025-B01	36	150.000 kg	0.800 kg	Available	...
BC0001/2025-26	09/03/2026	YR0001/2025-26	Lakshmi Weaving Mills	20s 2/100	LOT-2025-A01	24	100.000 kg	0.500 kg	Available	...

4.3 Warping Job Card Initiation

Overview & Purpose: Orchestrating primary weaving preparation steps by designating batches to warping equipment.

Step-by-Step Instructions:

- Go to 'Warping Job Card' under Sizing ERP.
- Initialize a new job card linked to a specific Party requesting the warp.
- Assign detailed Yarn lots to corresponding machines.
- Set objective constraints like Length target parameters required per job configuration.

4.4 Sizing Job Card (Set Report)

Overview & Purpose: High-level administration for end-to-end sizing production schedules.

Step-by-Step Instructions:

- View all pending, drafted, or authorized sizing sequences from the Job Card dashboard.
- Click 'New Set' to define a consolidated sizing operation encompassing machine type (Loom), targeted ends, and meter goals.
- Monitor status indicators showing physical stages and pending authorizations before the set goes active.

4.5 Beam Management Console

Overview & Purpose: Dynamic tracking of the entire available inventory of functional factory beams.

Step-by-Step Instructions:

- Open 'Beam Management'.
- Observe the status matrix distinguishing 'Available' beams ready for assignment vs. 'In Process' beams mounted within an active Sizing Card.
- Review tare metrics and use tracking tags connecting beams back to live processes.

4.6 Yarn Stock Ledger

Overview & Purpose: A highly-reliable, read-only auditing matrix tabulating exact global and segmented inventory amounts.

Step-by-Step Instructions:

- Access the 'Yarn Stock Ledger'.
- Use filters to condense views by distinct Yarn Count, Source Party, or particular shipment Lot Numbers.
- Analyze metrics such as 'Total Inward (kg)' versus 'Total Outward (kg)' calculating definitive real-time 'Balance Stock'.
- Export this ledger externally (PDF/CSV) for weekly physical audit operations.

4.7 Yarn Return DC Creation

Overview & Purpose: Processing protocol for returning flawed or surplus materials to original vendor mills.

Step-by-Step Instructions:

- Navigate to 'Yarn Return'.
- Create a new document to explicitly log job-work returns preventing balance discrepancies.
- Specify exact return weights referencing the initial Lot Numbers.

4.8 Yarn Delivery DC Compilation

Overview & Purpose: Final dispatch procedural records clearing operations upon project completion.

Step-by-Step Instructions:

- Move to the 'Yarn Delivery' component.
- Draft a new Outbound Delivery pointing to finalized Sizing Sets or Beams.
- Verify total gross vs net weight (taring) before assigning to a delivery vehicle, generating a formal outbound challan document.

The screenshot displays the 'Yarn Delivery DC' page within the 'SUDHAN TEXTILE SIZING ERP SYSTEM'. The page is accessed via the browser address 'localhost:3000/sizing/yarn-delivery'. The left sidebar contains a navigation menu with options like 'Vehicle Master', 'Financial Year', 'Document Series', 'Sizing ERP' (active), 'Yarn Receipt', 'Baby Cone / Winding', 'Warping Job Card', 'Sizing Job Card', 'Beam Management', 'Yarn Stock Ledger', 'Yarn Return', 'Yarn Delivery', 'GST Tax Invoice', and 'Spinning ERP'. The main content area shows a summary of delivery statistics: 'Total Deliveries: 1', 'Pending Approval: 1', 'Ready to Dispatch: 0', and 'Total Weight: 50.000 kg'. Below this is a search bar and a table listing delivery challans. The table has columns for DC NO, DATE, PARTY, WEIGHT (KG), VEHICLE, STATUS, and ACTIONS. A single entry is visible: DC NO YD0001/2025-26, DATE 13/03/2026, PARTY New Textile Mills, WEIGHT (KG) 50.000, VEHICLE -, STATUS Draft, and ACTIONS ... The bottom of the screen shows a Windows taskbar with various application icons and a system clock indicating 14:11 on 05-04-2026.

DC NO	DATE	PARTY	WEIGHT (KG)	VEHICLE	STATUS	ACTIONS
YD0001/2025-26	13/03/2026	New Textile Mills	50.000	-	Draft	...

4.9 GST Tax Invoice Finalization

Overview & Purpose: Conversion of operational completed data into binding financial accounts.

Step-by-Step Instructions:

- Access 'GST Tax Invoice'.
- Click '+ New Invoice'. You can typically import verified data spanning from an authorized Delivery DC.
- Let the system automatically calculate defined Service amounts and HSN/SAC parameters.
- Verify the automated split of Tax components (CSGT, SGST, IGST) determined by inter-state rules.
- Save and export the invoice for the finance team/party delivery.

5. Settings, Security & Governance

This sector maintains the granular configuration governing security, data longevity, logic compliance, and operational rights matrices limits.

5.1 Profile Settings Initialization

Overview & Purpose: Allows individual operators to modify their localized contact profiles.

Step-by-Step Instructions:

- Access the 'Profile Settings' page through the settings menu.
- Modify personal names and review account readiness.
- Review localized metrics concerning 'Last Login' timestamping and current system role definition.

5.2 User Management

Overview & Purpose: SuperAdmin control module orchestrating all human interaction within the application.

Step-by-Step Instructions:

- Open 'User Management'.
- Click '+ Add User' to assign credentials for new personnel.
- Provide explicit Roles (Manager, Operator) linking their identity to respective departments.
- Administratively override, lock, or disable users suspected of invalid activities.

5.3 Role & Permission Configuration

Overview & Purpose: Implementation of strict Role-Based Access Control logic.

Step-by-Step Instructions:

- Navigate to the 'Role Permissions' pane.
- Select specific predefined roles (e.g., Operator layer versus Managerial layer).
- Activate or retract detailed module-specific checkboxes defining Read, Write, and Authorization capabilities per form type.

5.4 Approval Matrix Structuring

Overview & Purpose: Configuration defining secondary verification thresholds on critical documents.

Step-by-Step Instructions:

- Go to 'Approval Matrix'.
- Select distinct workflows (e.g., 'Yarn Receipt' vs 'Sizing Job Card').
- Configure mandatory authorization limits. Enable configurations dictating that Job Cards exceeding predetermined weight or value thresholds demand explicit managerial digital signatures before processing.

5.5 System Configuration Constants

Overview & Purpose: Root level deployment configuration defining baseline logical values.

Step-by-Step Instructions:

- Check 'System Settings'.
- Implement standardized values ensuring consistency, such as global 'Company Currency' to 'INR'.
- Fix the 'Time Zone' variable guaranteeing accurate timestamp correlations required for precise database transactions.

5.6 Security Policies Enactment

Overview & Purpose: Risk mitigation configurations to throttle external attacks.

Step-by-Step Instructions:

- Open 'Security Policies'.
- Establish lockout thresholds mitigating brute force behavior by limiting 'Max Failed Login Attempts' (e.g., set to 5).
- Designate the strict automated 'Lockout Duration' forcing suspended timeouts.

5.7 Audit Logs Compliance Tracker

Overview & Purpose: Immutable chronological surveillance of all recorded systemic transactions.

Step-by-Step Instructions:

- View 'Audit Logs' to analyze historical operational flow.
- Filter through chronological stamps highlighting specific 'Actions' (Create, Update, Delete).
- Cross-references data points tracking modifications tied back directly to specific IP addresses and internal Users preventing operational denials.

5.8 Backup & Data Safety Scheduling

Overview & Purpose: Routine prevention ensuring operational integrity via database snapshots.

Step-by-Step Instructions:

- Open 'Backup & Safety'.
- Configure interval timings scheduling automated 'Full Database Backups'.
- Define retention policies dictating how many days historically the local files are maintained.
- Execute out-of-cycle saves utilizing the manual 'Run Backup Now' function.

5.9 Notification & Alert Configuration

Overview & Purpose: Systemic broadcasting ensuring important process failures alert necessary personnel.

Step-by-Step Instructions:

- Navigate to 'Notifications'.
- Turn on explicit systemic events (e.g., flagging 'Backup Failure Alerts').
- Select which functional Roles (e.g. Administrators only) are pushed the alerts.
- Initiate mock tests triggering the alert network mapping verifications.
